

Meeting of the

Friends of Willand Pond

Willand Pond is Coming Back!

February 18, 2010, 6:00 PM

Strafford Farms Restaurant, Dover NH

Agenda:

- Presentation on Volunteer Water Quality Sampling –
Sara Steiner from NHDES's Volunteer Lake Assessment Program
- Review of the draft meeting calendar, and proposed speakers and presentations leading up to the May 1st event.
- Review of actions identified at the January Meeting
- Create a work plan and assign tasks for the May 1st event
- Other items

The creation of the “Friends of Willand Pond” is an outreach and education effort funded by the NH Department of Environmental Services, and supported by the planning firm Jeffrey H. Taylor and Associates. This is not a City Committee. This effort will involve interested community members, and will focus on improving the stewardship and use of Willand Pond and the surrounding lands that contribute to the recreation use of the land around the Pond. This may include the sharing of information regarding surface runoff, the use (or avoidance) of chemicals in the watershed (for both winter and summer surface treatment) and a variety of other pertinent issues identified by its members. Please join us and help Willand Pond!
